## Acknowledgments

This report is the culmination of significant work led by Greene County Department of Public Health and Vidant Health, in conjunction with key stakeholders from the community. Many other entities also provided support for this document. Greene County Department of Public Health appreciates the help of our vital community stakeholders. In addition, thank you to our partners and organization leaders who helped prioritize the data to determine and set Greene County's priority areas.

## Executive Summary

## Vision Statement

Greene County is pleased to present its 2021 Community Health Needs Assessment. This report provides an overview of the methods and processes used to identify and prioritize significant health needs in Greene County. The service area for this report is defined as the geographical boundary of Greene County, North Carolina. Greene County is inland from the state's coastal area and has a total area of 266 square miles, of which 266 square miles is land and 0.5 square miles is water.

## Leadership

Greene County Department of Public Health and Vidant Health collaborated to lead the Community Health Needs Assessment process in Greene County.

Leadership included:

- Joy Brock, MPH - Greene County Department of Public Health, Health Director
- Emmanuelle Quenum, MPH, CHES ${ }^{\circledR}$ - Greene County Department of Public Health, Human Services Planner II
- Melissa Roupe, RN, MSN - Vidant Health, Senior Administrator, Community Health Improvement
- Jennifer Bennett, BS - Greene County Department of Public Health, Health Educator II

## Partnerships/Collaborations

| Partnerships | Role |
| :--- | :--- |
| Eastpointe | A Managed Care Organization (MCO) dedicated <br> to working with individuals and families in <br> eastern North Carolina who struggle with <br> substance abuse, mental health, and intellectual <br> and developmental disabilities |
| Greene County Department of Social Services | Provides economic aid, social assistance, <br> protection of children and adults, encourages <br> self-sufficiency and promotes responsibility |
| Greene County Interfaith | Operates a food pantry for needy families |
| Greene County NC Cooperative Extension | Partners with communities to deliver education <br> and technology that enrich the lives, land, and <br> economy |
| Greene County Recreation | Provides parks, recreation facilities, and <br> recreational activities for all ages |
| Greene County Senior Center | Promotes the health, well-being, and quality of <br> life of all Senior Citizens |
| Greene County Schools | Focuses on student achievement |
| Greene County Transportation | Provides "dial-a-ride" type transportation <br> services for residents |
| Greene Lamp | Provides extensive case management services to <br> low-income families for them to become more <br> self-sufficient and overcome poverty |
| Senoir-Greene Partnership for Children | Supports children and families in a safe and <br> healthy environment through accessible quality <br> childcare and family services |

## Collaborative Process Summary

## Key Findings

Key findings are drawn from an analysis of an extensive set of secondary data and in-depth primary data from a survey given to our community members. The survey examined the quality of life, health behaviors, perceptions, preventive services, exercise, and access to care. The top three leading causes of death for Greene County residents were cancer, heart disease, and cerebrovascular disease. The top three health behaviors of Greene County concern were physical inactivity, adult obesity, and adult smoking. Community members' top three quality of life issues in the survey were low income/poverty, drug/alcohol (substance abuse), and lack of affordable housing.

## Health Priorities

The top two health priorities selected for the 2021 Community Health Improvement Plans were

- Healthy Behaviors (includes addressing substance misuse and healthy weight)
- Physical Environment (includes addressing physical activity and healthy foods)

## Next Steps

Greene County Department of Public Health and Vidant Health will collaborate with community partners and organizations to develop and implement Community Health Improvement Plans focusing on 2021 Health Priority areas.

## Chapter 1 Introduction

## Description of County

Greene County is located in beautiful eastern North Carolina in the middle of the coastal plain. It is bordered to the south by Lenoir County, to the northeast by Pitt County, to the west by Wayne County, and to the northwest by Wilson County. Greene County encompasses a land area of approximately 266 square miles and a water area of 0.5 square miles. Snow Hill is the county seat and the largest town and major commercial center in the county. The town draws its name from the historic white sandy banks of nearby Contentnea Creek. Other towns in Greene County include Hookerton and Walstonburg. Maury is also a Census-designated place in Greene County. The county is divided into nine townships: Bull Head, Carrs, Hookerton, Jason, Olds, Ormondsville, Shine, Snow Hill, and Walstonburg (Speights Bridge).

The major highways that run through Greene County are U.S. 13, US 258, and US 264. Other highways include NC 903, NC 58, NC 102, NC 91, NC 123, and NC 121. No Interstate highways traverse the county, but l-95 is located in Wilson County, and I-795 is located in Wayne County. The closest airport to Greene County is Pitt-Greenville Airport, with service to Charlotte Douglas International Airport, although most residents use Raleigh-Durham International Airport for domestic and international travel.

Residents in Greene County enjoy a small-town living experience while having quick access to major urban areas.

## Overview of Health ENC

Health ENC is a collaborative initiative of health departments and hospitals in eastern North Carolina. The collaborative serves 35 counties with 34 participating health departments and 31 participating hospitals. The collaborative uses a shared approach for primary and secondary data collection to produce a comprehensive Regional Community Health Needs Assessment every three years that can be used to partially satisfy requirements for North Carolina Local Health Department Accreditation and the Internal Revenue Service requirement under the Patient Protection and Affordable Care Act for charitable hospitals.

## Overview of Community Health Needs Assessment Process

The Community Health Needs Assessment Process gathers population health data that county health departments, hospitals, and community groups can use to

- Identify key health needs/issues in eastern North Carolina Communities
- Develop strategies and action plans based on data aimed at improving the quality of life
- Collaborate to maximize results by having a collective impact on the region
- Maintain local control and decision-making about the choice of health priorities and interventions, and
- Improve health, partnerships, and communication.

## Participating Health ENC Counties

Health ENC serves the following counties: Beaufort, Bertie, Bladen, Camden, Carteret, Chowan, Craven, Cumberland, Currituck, Dare, Duplin, Edgecombe, Franklin, Gates, Greene, Halifax, Hertford, Hoke, Hyde, Johnston, Jones, Lenoir, Martin, Nash, Northampton, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Sampson, Tyrrell, Washington, and Wayne Counties.

## Health Data Sources

Primary Data - Community Survey
Survey Methodology/Design
Health ENC Steering Committee structured the primary data collection for participating health departments and hospitals. The primary data used in the Community Health Needs Assessments included (1) a community survey that could be distributed online or by a paper submission and (2) focus group discussions in some counties. The Health ENC Steering Committee did not encourage focus groups for the 2021-2022 Community Health Needs Assessments because of the global COVID-19 pandemic. However, some counties were able to hold focus group discussions safely despite significant challenges in collecting enough survey responses to accurately represent their community's population.

## Survey Design:

The Health ENC Steering Committee developed a primary survey to gather information from community members about their health concerns. A workgroup of Steering Committee members convened and examined survey questions utilized in the 2018-2019 Community Health Needs Assessment. The workgroup also examined data readily available from secondary data sources. The workgroup focused on developing survey questions to obtain data from community members which was not readily available in the secondary data or where secondary data was weak. In addition, workgroup members worked to combine questions where appropriate and to be more inclusive in the wording of response choices. The Steering Committee reviewed the sample survey questions and made a few additional revisions to ensure the survey only contained questions where community input was needed to guide health priority selection and strategic action planning.

Once the survey questions were finalized, the Steering Committee decided on targets for each county. Because the survey was a convenience sample that was being conducted during a global pandemic (COVID-19), each county was asked to complete a minimum of 300 surveys with representation from as many community groups as possible to assure sufficient sampling to represent the full community. The target of 300 surveys per county was identified through previous work with data analysis vendors who examined each county's population and confirmed this number should provide an accurate reflection of the total county's population if responses reflected the population demographics equally.

The surveys were made available to the public from April 1 - June 30, 2021. Surveys were made available in paper format and electronically using the REDcap software. Health ENC partners received feedback throughout the survey period on the age, gender, race/ethnicity, and language of survey respondents to assist them in promoting the surveys to various community members within their counties. At the completion of the survey period, 16,661 English surveys and 502 Spanish surveys were completed. Most counties did not have an equally distributed response to surveys to represent their entire county's population. As a result, survey responses should be considered as only one component of information utilized to select health priorities. The most underserved populations' feedback is not adequately reflected in most surveys. Health ENC partners were encouraged to include key stakeholders who served these populations in the health priority selection process to assure many of their clients' health needs were considered.

The community health needs assessment survey contained 25 questions. The survey, which was available in both Spanish and English languages, was accessible online and via paper. The survey was open from April 1 through June 30, 2021. The surveys were promoted on Greene County Department of Public Health's website, Facebook page, and social media pages of community organizations, and community partners were used to help encourage county feedback and participation.

## Key Areas Examined

- Quality of life, health behaviors, health perceptions,
- Preventative services, exercise, and access to care

County Responses

- 125 Total English (Total in ENC survey $=16,661$ )
- 3 Total Spanish (Total in ENC survey $=502$ )

## Secondary Data Sources

Additional data sources can be found in the Appendices.

## Limitations

- The data presented represents a snapshot of the population, economic, and leading health and wellness issues in eastern N.C. communities
- It includes primary data gathered from community surveys and secondary data from health and other sources.
- This information can be used as a guide for helping communities identify leading health issues in the Health ENC Country Region
- Other health issues, data, and resources may be available that were not listed here that communities may wish to consider when establishing health priorities

## Chapter 2 Demographic Profile

## Total Population

- In 2019, Greene County had a population estimate of 21,069.
- From 2016 to 2019, the total population of Greene County has decreased by $0.04 \%$.

## Minority Populations

Percent of Population by Race/Ethnicity (Census, 2015-2019)

The White population accounts for $59.5 \%$ of the total population in Greene County, with the Black or African American population accounting for $34.9 \%$ of the total population. The White population in Greene County (59.5\%) is less than the White population in North Carolina (68.7\%) and less than the Health ENC counties (64.9\%). The Black or African American population in Greene County (34.9\%) is higher than the Black or African American population in North Carolina (21.4\%) and higher than the Health ENC counties (30.0\%). The Hispanic or Latino population comprises 15.1\% of Greene County, which is significantly higher than North Carolina (9.4\%) and Health ENC Counties (9.6\%)

## Population Growth

- The projected population for Greene County in 2029 is estimated at 20,842 persons
- From 2010 to 2019 , the total population of Greene County has decreased by an overall $1 \%$

Note: Population projection for 2029 comes from the NC Office of State Mgmt and Budget Pop Projections. All the other population data is from the Census

Age Groups
Percent of the Population by Age Group

In Greene County, the percentage of people between the ages of $55-64$ is higher ( $14.6 \%$ ) than Health ENC ( $12.8 \%$ ) and N.C. (12.8\%).

## Military/Veteran Populations

Military Population
Percent of Population in Military (ACS, 2015-2019)

This figure shows the trend of the military population over the 4 most recent measurement periods. From 2015-2019, across four time periods, the percent of the population in the military for Greene County was lower than North Carolina and the Health ENC region.

In fact, the Census did not report any military population in Greene County during this period. North Carolina had an average of $1.1 \%$ in all counties, while the Health ENC region had 4.8\% of the population.

## Veteran Population

The veteran population is given as a percent of the civilian population aged 18 years and older and this data is used for policy analyses, to develop programs, and to create budgets for veteran programs and facilities. Greene County has a veteran population of $6.1 \%$, compared to 8.4\% for North Carolina and $12.1 \%$ for Health ENC counties.

## Analysis of Demographic Data

Although Greene County's population has been slowly decreasing over the past three years, its birth rate has increased in the same timeframe. White, Black or African American, and Hispanic or Latino are the top three races/ethnicities living in the county.

Seasonal migrant farmworkers are not reflected in the population data in this report. Seasonal farmworkers are individuals who are employed in agricultural work but do not move from their permanent residence to seek agricultural work. They may work in agriculture at least $50 \%$ of their time and have other sources of employment during the non-agricultural season. Seasonal migrant farmworker populations are hard to track as they come from various locations and are here for a short period of time.

At the time of this report, data did not reflect the impact of the Coronavirus Pandemic on the population as statistics from the U.S. Census were only reported up until 2019.

## Chapter 3 Socioeconomic Profile

NC Department of Commerce Tier Designation

The North Carolina Department of Commerce annually ranks the state's 100 counties based on economic well-being and assigns each a Tier designation. The 40 most distressed counties are designated as Tier 1, the next 40 as Tier 2, and the 20 least distressed as Tier 3. Greene County has been assigned a Tier 1 designation for 2021.

In 2021, Greene County was assigned a Tier 1 designation.
County Tiers are calculated using four factors:

- Average unemployment rate
- Median household income
- Percentage growth in population
- Adjusted property tax base per capita

## Income

Median household income reflects the relative affluence and prosperity of an area. Areas with higher median household incomes are likely to have a greater share of educated residents and lower unemployment rates. This figure shows the median household income in Greene County $(\$ 39,837)$, which is much lower than the median household income in North Carolina $(\$ 54,602)$.

Federal poverty thresholds are set every year by the Census Bureau and vary by size of family and ages of family members. A high poverty rate is both a cause and a consequence of poor economic conditions. Children in poverty are more likely to have physical health problems, behavioral problems and emotional problems. Seniors who live in poverty are an especially vulnerable group due to increased physical limitations, medical needs, and social isolation. Persons with a disability are more likely to live in poverty compared to the rest of the population. Without adequate income, individuals with disabilities may not be able to afford necessary expenses, such as rent or mortgage, utility bills, medical and dental care, and food.

As seen in this figure, 23.0\% percent of the population in Greene County lives below the poverty level, which is higher than the rate for North Carolina (15\% of the population) and the Health ENC region (17.5\%).

Poverty by Race and Ethnicity

[^0]The most common racial or ethnic group living below the poverty line in Greene County, NC, is White, followed by Black and Hispanic.

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who classifies as impoverished. If a family's total income is less than the family's threshold, then the entire makeup of that family is considered to be living in poverty.
*Data from the Census Bureau ACS 5-year Estimate.

## Children in Poverty

The rate of both children and older adults below the poverty level is much higher for Greene County when compared with N.C. and the Health ENC Counties.

Older Adults in Poverty

Percent Adults 65+ Living Below Poverty Level (2015-2019)

- The rate of adults age $65+$ years living in poverty is $1.9 \%$ higher in Greene County when compared with NC and the Health ENC counties by $0.7 \%$.

## Disabled People in Poverty

The Census American Community Survey does not provide an estimate for the percent of disabled people living in poverty for Greene County.

## Housing

Median Monthly Housing Costs

The average household size in Greene County is 2.56 people per household (owners) and 2.67 people per household (renters), which is slightly lower than the North Carolina value of 2.57 people per household (owners) but slightly higher for renters ( 2.43 people per household).

High costs of homeownership with a mortgage can strain both homeowners and the local housing market. This figure shows mortgaged owners median monthly household costs in the Health ENC region. In Greene County, the median housing costs for homeowners with a mortgage is $\$ 1,016$. This is lower than the North Carolina value of $\$ 1,314$.

Median Monthly Household Costs in Greene County and Surrounding Counties

## Severe Housing Problems

- Safe and affordable housing is an essential component of healthy communities, and the effects of housing problems are widespread.
- Housing problems include overcrowding, high housing costs, lack of kitchen, or lack of plumbing facilities
- Slightly more than $17.0 \%$ of households in Greene County have severe housing problems, compared to $15.0 \%$ in North Carolina and 16.1\% in Health ENC Counties.

## Food Insecurity

Households with SNAP Benefits

The Supplemental Nutrition Assistance Program (SNAP) is a federal assistance program that provides low-income families with electronic benefit transfers (EBTs) that can be used to purchase food. The goal of the program is to increase food security and reduce hunger by increasing access to nutritious food.

This figure shows the percent of households with children that participate in SNAP. The rate for Greene County, $24 \%$, is much higher than the state value of $13 \%$ and the Health ENC region value of $16.7 \%$.

## Education

## Educational Attainment

Graduating from high school is an important personal achievement and is essential for an individual's social and economic advancement. Graduation rates can also be an important indicator of the performance of an educational system. Having a bachelor's degree opens up career opportunities in a variety of fields and is often a prerequisite for higher-paying jobs.

- In Greene County the percent of residents 25 or older with a high school degree or higher was lower (75\%) than the state value (87.8\%) and the Health ENC region (86.6\%).
- Percent with a higher education attainment in Greene County was lower (11\%) compared to N.C. (31.3\%) and Health ENC region (22.0\%).

High school dropouts earn less income than high school and college graduates and are more likely to be unemployed. High school dropouts are generally less healthy and require more medical care. Further, high school dropout rates are linked with heightened criminal activity and incarceration rates, influencing a community's economic, social, and civic health.

- Greene County's high school dropout rate was $0.8 \%$ in 2019-2020, which was lower than the rate in North Carolina (1.5\%) and the Health ENC region (1.4\%).
- Greene County's high school dropout rate has remained constant except for 2018-2019 when it dropped to 0.5\%.

## High School Suspension Rate

High school suspension is a form of discipline in which a student is temporarily removed from a classroom and/or school due to a violation of school conduct or code. Higher rates of suspension can be related to high rates of antisocial or delinquent behaviors, which may further contribute to potential future involvement in the juvenile justice system. Additionally, schools with higher suspension rates have higher rates of law or board of education violations and generally spend more money per student.

- Greene County's rate of high school suspension (20.4 per 100 students) was higher than North Carolina's rate (11.6) the Health ENC counties (15.5) in 2019-2020

## Transportation

Public transportation offers mobility, particularly to people without cars. Transit can help bridge the spatial divide between people and jobs, services, and training opportunities. Public transportation also reduces fuel consumption, minimizes air pollution, and relieves traffic congestion. Walking to work helps protect the environment while providing the benefit of daily exercise.

- In Greene County, an estimated $0.1 \%$ of workers commute to work by public transportation, compared to the state value of 1.0\%.
- Approximately $2.1 \%$ of workers in Greene County walked to work, which was higher than the state value of $1.8 \%$.
- An estimated $81.7 \%$ of workers 16 and older drove alone to work, compared to $80.9 \%$ in N.C.

## Crime and Safety

Both violent crime and property crime are indicators of a community's crime and safety. Violence negatively impacts communities by reducing productivity, decreasing property values, and disrupting social services. Violent crime includes four offenses: murder and non-negligent manslaughter, rape, robbery, and aggravated assault. Property crime includes burglary, larceny-theft, motor vehicle theft, and arson.

- From 2016 to 2019, the violent crime rate in Greene County increased from 179.6 to 309.2.
- During the same period, the property crime rate decreased from 2107.9 to 1721.8 but was lower than the N.C. rate

## Juvenile Crime

Youth who commit a crime may not gain the educational credentials necessary to secure employment and succeed later in life. Negative peer influences, history of abuse/neglect, mental health issues, and significant family problems increase the risk of juvenile arrest. The juvenile justice system aims to reduce juvenile delinquency through prevention, intervention, and treatment services.

The undisciplined rate describes juveniles who are unlawfully absent from school, regularly disobedient and beyond disciplinary control of the parent/guardian, are regularly found where it is unlawful for juveniles to be, or have run away from home for more than 24 hours.

- In 2020, the juvenile undisciplined rate in Greene County (0.32) was lower than the rate in North Carolina (0.97) and the Health ENC region (0.78)
- In 2020, the juvenile delinquent rate for Greene County was higher (20.41) than N.C. (18.1) but lower than the Health ENC region (21.4)

## Child Abuse

Child abuse includes physical, sexual and emotional abuse. All types of child abuse and neglect can have long lasting effects throughout life, damaging a child's sense of self, ability to have healthy relationships, and ability to function at home, at work, and at school.

- Overall, the child abuse rate in Greene County has decreased and was lower (3.4 per 1,000 pop.) than N.C. ( 8.0 per 1,000 pop.) and Health ENC County region (8.8 per 1,000 pop.).

## Incarceration

According to the U.S. Bureau of Justice Statistics, approximately one out of 100 adults in the U.S. are in jail or prison. Conditions in jails and prisons can lead to an increased risk of infectious diseases such as tuberculosis and hepatitis C , as well as assault from other inmates. After incarceration, individuals are likely to face a variety of social issues such as employment discrimination, disruption of family relationships and recidivism.

- Over the past four measurement periods, the incarceration rate in Greene County has decreased.
- In 2019-2020, the incarceration rate in Greene County was lower (224 per 1,000 population) than N.C. (304.2) and the Health ENC region (345.2).

Civic/Political Engagement

Exercising the right to vote allows a community to choose elected officials and hold them accountable. Voting ensures that all citizens have the opportunity to voice their opinions on issues such as the use of tax dollars, civil rights and foreign policy. By voting, individuals shape their communities and influence the next generation of society. A high level of voter turnout indicates that citizens are involved and interested in who represents them in the political system.

- Greene County has a higher percent of residents of voting age (79.5\%) than North Carolina (77.6\%) and the Health ENC Counties (77.1\%).

Greene County's Tier 1 designation is among the 40 most economically distressed counties. This is also reflected in its poverty rates, median income, housing, food insecurity, and lack of transportation.

Although Greene County lacks a public transportation system, Greene County Transportation provides a "dial-a-ride" service for its residents. It offers free transportation to medical appointments, Lenoir Community College Snow Hill, places of employment, shopping, and Health \& Human Services trips. This service is available based on the space and federal and state funding it receives.

## Chapter 4 Clinical Care Profile

## Health Insurance Coverage

Medical costs in the United States are very high. People without health insurance may not be able to afford medical treatment or prescription drugs. They are also less likely to get routine checkups and screenings, so if they do become ill they may not seek treatment until the condition is more advanced, and therefore more difficult and costly to treat.

- Nearly $20 \%$ of the population 0-64 years of age in Greene County are uninsured.
- The rate of individuals aged 0-64 years old that have health insurance coverage in Greene County is $80.4 \%$, which was lower than the rate for North Carolina (87.3\%) and the Health ENC region (87.0\%).

Government Health Insurance Only Coverage - Medicaid, Medicare, Tricare

This graph shows the percent of the population only receiving health insurance through Medicaid, Medicare, or military healthcare (TRICARE).

- In Greene County, 19.4\% of the population report receives health insurance coverage through Medicaid, 5.9\% Medicare and 0.4\% Tricare

## Primary Care Practitioners

Notes: Updated March 10, 2020 to reflect adjustments to 2017 nurse practitioner data. Primary care physicians, physician assistants, and nurse practitioners are defined as in Spero, J. C., \& Galloway, E. M. (2019). Running the Numbers. North Carolina Medical Joumal, 80(3), 186-190. Physicians with a primary area of practice of obstetrics/gynecology were weighted as 0.25 of a full-time equivalent (FTE) primary care practitioner. All other primary care physicians were weighted as 1 FTE. Primary care physician assistants, nurse practitioners, and certified nurse midwives were weighted as 0.75 FTE. Physician and physician assistant data are derived from

## SHEPSHEALTH WORKFORCE NC

 licensure data provided by the North Carolina Medical Board. This analysis only includes physicians who are not residents-in-training and are not employed by the Federal government. Nurse practitioner and certified nurse midwife data is derived from licensure data provided by the North Carolina Board of Nursing. Data include active, licensed practitioners in practice in North Carolina as of October 31, 2017. Practitioners areassigned to counties based on primary practice location. County populations were adjusted for age and gender according to primary care use rates described in data from the Medical Expenditure Panel Survey. The raw (unadjusted) population data was from the NC Office of State Budget and Management

Access to primary care is necessary to improve the health outcomes of communities. With the recent spread of the novel coronavirus in North Carolina, primary care is critical as an entry point to further care.

Many rural areas of North Carolina lack adequate access to primary care providers. The disparities in access between rural and metropolitan areas have continued to grow despite an overall increase of physicians in N.C.

On the map above, green indicates the county is meeting the N.C. Institute of Medicine's target ratio of 1 primary care provider to every 1,500 people.

Greene County is shaded green and meets the N.C. Institute of Medicine's target ratio of 1 primary care provider to every 1,500 people.

Currently, $\mathbf{6 0 \%}$ of NC's $\mathbf{1 0 0}$ counties meet the NCIOM's target. Seven counties were substantially below target: Anson, Northampton, Franklin, Warren, Gates, Tyrrell, and Camden. Camden has a population of just over 10,000 and no primary care providers.

The NCIOM definition of primary care clinician includes physicians, nurse practitioners (NPs), physician assistants (PAs), and certified nurse midwives (CNMs).

## Analysis of Clinical Care Profile

Not having health insurance creates barriers when seeking care and paying for treatment and prescription medications. Nearly 20\% are uninsured from ages 0-64, and almost 20\% have government insurance (Medicare, Medicaid, or Tricare).

## Chapter 5 Chronic and Communicable Disease Profile

## Top Ten Reportable Communicable Diseases

Note: For NC State-wide rates and reported number of cases, refer to https://public.tableau.com/app/profile/nc.cdb/viz/NCD3NorthCarolinaDiseaseDataDashboard/DiseaseMapsandTrends Data Source: NCDHHS, (latest available data, 2018).

Note: To view and compare communicable disease rates in your county with NC State-wide rates, reported number of cases, etc., view the custom dashboard
https://NCD3NorthCarolinaDiseaseDataDashboard
Preventing and controlling the spread of communicable diseases is a top concern among communities.
The top communicable diseases reported by NC DHHS in Greene County in 2018 are shown above.
Chlamydia ranked highest among the percent of cases reported. Chlamydia is a common STD that can infect both men and women. It can cause severe and permanent damage to a woman's reproductive system.

Communicable case counts and rates at the state and county level can be found by following the web link in the slide.

## Analysis of Chronic and Communicable Disease Profile

The top three leading causes of death in Greene County are cancer, heart disease, and cerebrovascular disease. The top 3 leading causes of death by injury are unintentional motor vehicle traffic accidents, unintentional poisoning, and unintentional falls. Chlamydia, a common sexually transmitted disease, is the highest-ranked communicable disease in the county. Chlamydia affects both men and women. Left untreated, it may increase the risk of HIV and can cause permanent reproductive damage in women.

## Chapter 6 HNC 2030 Indicator Rankings by Health ENC Regions

| Indicators / Measures | Greene | NC |
| :---: | :---: | :---: |

## Chapter 7 County Health Ranking Indicators

## Population Health Model

The County Health Rankings are based on a model of community health that emphasizes the many factors that influence how long and how well we live. The Rankings use more than 30 measures that help communities understand how healthy their residents are today (health outcomes) and what will impact their health in the future (health factors). Explore the Model to learn more about these measures and how they fit together to provide a profile of community health

- There are many factors that influence how well and how long people live.
- The County Health Rankings model (right) is a population health model that uses data from different sources to help identify areas of concerns and strengths to help communities achieve health and wellness.
- The Rankings provides county-level data on health behavior, clinical care, social and economic and physical environment factors.

## Chapter 8 Survey Findings

Top 3 Quality of Life issues identified in the survey

- $26.42 \%$ (93) responded Low income/poverty
- $13.92 \%$ (49) responded Drug/alcohol (substance abuse)
- $10.23 \%$ (36) responded lack of affordable housing

Greene County Quality of Life Ranking

People responded to certain questions when asked about how they felt or viewed issues supporting a safe and healthy lifestyle in their county.

## Do you (strong) disagree, are neutral, or (strongly) agree with the following?

There is good healthcare in my county This county is a good place to raise children

This county is a good place to grow old There is plenty of economic opportunity in this.. This county is a safe place to live There is plenty of help for people during times of... There is affordable housing that meets the needs..
There are good parks and recreation facilities in..
It is easy to buy healthy foods in this county

Greene County Quality of Life Ranking

- This graph shows how people responded to specific questions about how they feel or view issues supporting a safe and healthy lifestyle in their county.
- For example, in the first question, when asked, "there is good healthcare in my county," less than $20 \%$ of people either strongly disagreed or disagreed, while a similar number, more than $60 \%$, agreed and strongly agreed.
- Overall, far more people agreed than disagreed that Greene County "is a safe place to live." When asked, "there is plenty of economic opportunity in this county," more than $60 \%$ of people either strongly disagreed or disagreed, while less than $20 \%$ agreed or strongly agreed.

## QUESTION: Have you had a COVID-19 vaccine?

- This community survey question asked people if they had received a COVID-19 vaccine.
- Between April 1 and June 30, 2021, approximately $76 \%$ of participants reported being vaccinated for COVID19 , while $24 \%$ had not been vaccinated.

## COVID-19 Vaccine

## Chapter 9 Inventory of Resources

As a small rural community, Greene County lacks resources to address some of the needs related to their leading health concerns. The top three leading causes of death in Greene County are cancer, heart disease, and cerebrovascular disease. Risk factors include overweight/obesity, lack of physical activity, and hypertension. In 2019, Greene County opened its first Wellness Center that is free to use for Greene County residents.

The Wellness Center will be able to assist in addressing risk factors related to chronic disease prevention and management. The facility boasts a gymnasium, fitness center, meeting rooms, batting cages, and administrative spaces. The Greene County Wellness Center is located in the Greene County Recreation Complex, which includes three baseball fields, a football/soccer field, a playground, picnic areas, and a walking trail. In addition, the facility can serve as a Hurricane/Disaster Shelter and is equipped with an emergency-powered generator that can keep the facility with power throughout a storm.

Greene County is addressing the opioid epidemic and has partnered with Lenoir and Wayne Counties to tackle this issue. An essential resource that is missing in the county to help in addressing this issue is substance use treatment and recovery facilities. The closest facility is over twenty miles away.

Greene County has created a Wellness \& Resource Guide as a requirement of the Community Health Needs Assessment to identify existing resources that impact the county's leading health concerns and social determinants of health. The guide can be found at www.greenecountync.gov/health

## Chapter 10 Community Prioritization Process

Greene County Department of Public Health's Leadership met to determine a list of stakeholders to invite to the Greene County Stakeholder meeting. Due to the COVID-19 pandemic, the stakeholder meeting was held virtually via Zoom. This meeting was held on February 24, 2022. Primary and secondary data were shared at this meeting, and opportunities to ask questions were provided. After the presentation, attendees were given a list of health priority focus areas. By use of a poll, they were able to vote for the top three areas they felt were important to focus on. After the poll concluded, the top two health priority areas were chosen.

The top two health priorities selected for the Community Health Improvement Plans were

- Healthy Behaviors (includes addressing substance misuse and healthy weight)
- Physical Environment (includes addressing physical activity and healthy foods)

## Appendix B

## HNC 2030 County/State Data

| Social and Economic Factors |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Health Indicator | Desired Result | Definition | Greene County | North Carolina | HNC 2030 Target |
| Poverty* | All people in North Carolina are financially stable and have lifetime economic prosperity. | Percent of individuals with incomes at or below 200\% of the Federal Poverty Level | No data available | $\begin{gathered} 31 \% \\ (2020) \end{gathered}$ | 27.0\% |
| Unemployment* | All people of working age in North Carolina have equitable pathway to fulfilling employment. | Percent of population aged 16 and older who are unemployed but seeking work | No data available | $\begin{gathered} 6.4 \% \\ (2020) \end{gathered}$ | Reduce unemployment disparity ratio between white and other populations to 1.7 or lower |
| Short-term Suspensions | All people in North Carolina are supported by a K-12 educational system that values diversity, equity, and inclusion for its students, faculty, staff, and communities. | Number of out-ofschool short-term suspensions in educational facilities for all grades per 10 students | DPI unable to provide update to SCHS | $\begin{gathered} 1.5 \\ (2018-2019) \end{gathered}$ | 0.80 |
| Incarceration** | North Carolina embraces a fair and equitable justice system, free from racism and bias, where safety is foundational to all aspects of a free society, and all communities are free from harm and violence. | Incarceration in North Carolina prisons per 100,000 population | $\begin{gathered} 200 \\ (2020) \end{gathered}$ | $\begin{gathered} 288 \\ (2020) \end{gathered}$ | 150 |
| Adverse Childhood Experiences | All children in North Carolina thrive in safe, stable, and nurturing environments. | Percent of children who have experienced two or more Adverse Childhood Experiences at or below 200\% FPL | ACEs do not have county level data | $\begin{gathered} 20.9 \% \\ (2019 / 2010) \end{gathered}$ | 18.0\% |
| Third Grade Reading Proficiency | All children in North Carolina can discover the joy of reading at an early age and are supported in the home, school, and community to be lifelong readers. | Percent of children reading at a proficient level or above based on third grade End of Grade exams: Proficiency defined as Level 3 or higher | DPI unable to provide update to SCHS | $\begin{gathered} 56.8 \% \\ (2018-2019) \end{gathered}$ | 80.0\% |

Notes for social and economic factor data:
*Poverty and unemployment data come from American Community Survey - one-year estimates. 2020 ACS data are considered experimental and should not be compared to prior ACS data years. ACS data can only estimate county level data for a limited number of counties due to sample size, so 2019 data is reported here at the county level. ACS releases 5-year estimates in March 2022 that will be useful for comparisons going forward.
** Incarceration data should be age adjusted, but 2020 data set is considered experimental and does not include 13 and older population. Prior 2020, the rate is per 100,00 NC population age adjusted.

| Physical Environment |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Health Indicator | Desired Result | Definition | Greene County | North Carolina | $\begin{gathered} \hline \text { HNC } \\ 2030 \\ \text { Target } \\ \hline \end{gathered}$ |
| Access to Exercise Opportunities | All people in North Carolina have equitable and adaptive/adaptable access to physical activity opportunities across the lifespan. | Percent of the population living half a mile from a park in any area, one mile from a recreational center in a metropolitan area, or three miles from a recreational center in a rural area | $\begin{gathered} 40 \% \\ (2019) \end{gathered}$ | $\begin{gathered} 74 \% \\ (2019) \end{gathered}$ | 92.0\% |
| Limited Access to Healthy Food* | All people in North Carolina have equitable access to affordable, nutritious, culturally appropriate foods. | Percent of people who are low-income that are not near a grocery store | No data available | $\begin{gathered} 7 \% \\ (2015) \end{gathered}$ | 5.0\% |
| Food Insecurity** |  |  | No data available | $\begin{gathered} 14 \% \\ (2018) \end{gathered}$ | $\begin{aligned} & \text { (No } \\ & \text { target) } \end{aligned}$ |
| Severe Housing Problems | All people in North Carolina have safe, affordable, quality housing opportunities. | Percent of households with at least 1 of 4 severe housing problems | $\begin{gathered} \hline 17 \% \\ (2013- \\ 2017) \end{gathered}$ | $\begin{gathered} \hline 15 \% \\ (2013- \\ 2017) \end{gathered}$ | 14.0\% |

Notes for Physical Environment data:

* The U.S. Department of Agriculture last updated this measure in 2015.
** Food insecurity added to HNC 2030 because the data are updated annually (with a two-year delay in reporting).

| Health Behaviors |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Health Indicator | Desired Result | Definition | Greene County | North Carolina | HNC 2030 <br> Target |
| Drug Overdose Deaths | All individuals and families in North Carolina with substance use disorder receive person-centered care incorporating evidence-based behavioral and pharmacological approaches. | Number of persons who die because of drug poisoning per 100,000 population (unintentional poisoning deaths/overdose deaths) | $\begin{gathered} 19.10 \\ (2020) \end{gathered}$ | $\begin{gathered} 32.50 \\ (2020) \end{gathered}$ | 18.0 |
| Tobacco Use* | All people in North Carolina live in communities that support tobacco-free/e-cigarette-free lifestyles | Percentage of high school students reporting current use of any tobacco product | No Regional <br> Data <br> Available | $\begin{gathered} \text { MS: 10.4\% } \\ (2019) \\ \hline \end{gathered}$ | 9.0\% |
|  |  |  |  | $\begin{gathered} \text { HS: 27.3\% } \\ \text { (2019) } \\ \hline \end{gathered}$ | 9.0\% |
|  |  | Percentage of adults reporting current use of any tobacco product | $\begin{aligned} & 24.8 \% \\ & (2020) \end{aligned}$ | $\begin{aligned} & 22.6 \% \\ & (2020) \end{aligned}$ | 15.0\% |
| Excessive Drinking* | All North Carolina communities support safe and responsible use of alcohol. | Percent of adults reporting binge or heavy drinking | $\begin{aligned} & 17.3 \% \\ & (2020) \end{aligned}$ | $\begin{aligned} & 15.6 \% \\ & (2020) \end{aligned}$ | 12.0\% |

| Sugar-Sweetened <br> Beverage Consumption* | All people in North Carolina live in communities that support healthy food and beverage choices. | Percent of youth reporting consumption of one or more sugarsweetened beverages per day | DPI unable to provide update to SCHS | $\begin{aligned} & 30.1 \% \\ & (2019) \end{aligned}$ | 17.0\% |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Percent of adults reporting consumption of one or more sugarsweetened beverages per day | $\begin{aligned} & 39.5 \% \\ & (2019) \end{aligned}$ | $\begin{aligned} & 35.4 \% \\ & \text { (2019) } \end{aligned}$ | 20.0\% |
| HIV Diagnosis | All people in North Carolina experience sexual health with equitable access to quality and culturally competent prevention, treatment, and management of sexually transmitted infections. | Number of new HIV diagnoses per 100,000 population | $\begin{gathered} 11.1 \\ (2020) \end{gathered}$ | $\begin{gathered} 12.0 \\ (2020) \end{gathered}$ | 6.0 |
| Teen Births | All people in North Carolina live in communities support healthy choices for family planning and have equitable access to high quality, affordable reproductive health services. | Number of births to girls aged 15-19 per 1,000 population | $\begin{gathered} 26.4 \\ (2019) \end{gathered}$ | $\begin{gathered} 18.2 \\ (2019) \end{gathered}$ | 10.0 |

Notes for Health Behaviors data:
*Adult Tobacco Use, Adult Sugar-Sweetened Beverage Consumption, and Excessive Drinking data are only available as regional data from the Behavioral Risk Factor Surveillance System.
*BRFSS Data for Adult Smoking, Adult Sugar Sweetened Beverage Consumption, and Excessive Drinking are reported for the LHD Region, and is not county level data.
Note: HIV Diagnosis *2020 data should be treated with caution due to reduced availability of testing caused by the COVID-19 pandemic.

| Health Outcomes |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Health Indicator | Desired Result | Definition | Greene County | North Carolina | HNC 2030 Target |
| Infant Mortality | All babies in North Carolina are born healthy, thrive in caring and healthy homes, and see their first birthday. | Rate of infant deaths per 1,000 live births | $\begin{gathered} \hline 4.8 \\ (2020) \\ \hline \end{gathered}$ | $\begin{gathered} 6.9 \\ (2020) \\ \hline \end{gathered}$ | 6.0 |
|  |  | Disparity ratio between white non-Hispanic and African American, nonHispanic infant deaths | $\begin{gathered} 9.96 \\ (2016-2020) \end{gathered}$ | $\begin{gathered} 2.59 \\ (2016-2020) \end{gathered}$ | Black/White disparity ratio = 1.5 |
| Life Expectancy (years) | All people in North Carolina have long and healthy lives. | Average number of years of life remaining for persons who have attained a given age | $\begin{gathered} 76.9 \\ (2020) \end{gathered}$ | $\begin{gathered} 76.4 \\ (2020) \end{gathered}$ | 82.0 |

Notes on Health Outcomes:
*Disparity ratio - Rates based on less than 10 deaths are unreliable and should be interpreted with caution. Source: NC Department of Health \& Human Services State Center for Health Statistics, 29NOV2021. See table on website for more information.
https://schs.dph.ncdhhs.gov/data/vital/ims/2020/2020-IMR-TABLE3b.html

| Clinical Care |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Health Indicator | Desired Result | Definition | Greene County | North Carolina | HNC 2030 Target |
| Uninsured | All people in North Carolina live in communities with access to comprehensive, high quality, affordable health insurance. | Population under age 65 without insurance | No data available | $\begin{aligned} & 12.9 \% \\ & (2020) \end{aligned}$ | 8.0\% |
